Dear Legislator:

As your constituent and a supporter of public health, I am reaching out to you regarding a survey that you may have seen in your email inbox. Eat Smart Move More South Carolina (ESMMSC), a nonpartisan and nonprofit organization that is working across South Carolina to make the healthy choice the easy choice, is conducting a study to examine South Carolina decision-makers’ perceptions of the relative importance of different public health issues. ESMMSC will be using the information to develop district-specific educational materials to aid in your decision making as it relates to your public health interests. It’s important to me that you participate in the study because public health helps to shape our communities and to make them healthier and safer for generations to come.

I have included a link to the study survey below. It should only take about five minutes to complete. All of the information you provide will be maintained securely. If you are willing to sign the survey, it will allow for more district-specific resources to be gathered and prepared for your use.

https://www.surveymonkey.com/r/3YCXXBS (copy and paste link into your browser)

I hope you can help with this important endeavor. Thank you for your consideration. If you have already completed the survey, thank you for your time and help in understanding leaders’ perspectives on public health.

Sincerely,

(Your Name)
